

PSYM17-DC-212 Course description

Intervention for Child and Adolescent Mental Disorders

formázott: Sorkizárt, Behúzás: Bal: 2,5 cm

formázott: Behúzás: Első sor: 0 cm

Aim of the course

Aim of the course:

The course provides an overview into the evidence based interventions of child and adolescent mental disorders

Learning outcome, competences

knowledge:

Students gain an overview into the evidence based interventions (medication and psychotherapy) of child and adolescent mental disorders

attitude:

- Respect of patients and caregivers
- Professional humility
- Considering ethical standards and patients' rights
- Relying on evidence-based practice

skills:

- Students will be able to view childhood mental disorders in a complex bio-psycho-social model
- Collecting and evaluating evidences related to different intervention methods
- Indicating the appropriate intervention
- Understanding the basic mechanisms of action of each therapeutic modality.

Content of the course

Contents of the course

- Protocols
- Common questions of psychotherapies
 - Classification of psychotherapies
 - Process of psychotherapy
 - Systemic psychotherapy
 - Combination of methods
 - Common agents of psychotherapy
 - Efficacy of psychotherapy
 - Quality assurance in psychotherapies
 - Ethical and legal issues in psychotherapies
 - Training for psychotherapies
- Age-specific features and developmental approaches in the treatment of children and adolescents
- Methods of psychotherapy
 - Behavior therapy
 - Cognitive behaviour therapy
 - Third wave of CBT
 - Family therapy
 - Client-centred and experiential therapies
 - Interpersonal psychotherapy
 - Dynamic psychotherapy
 - Integrative psychotherapy
- Evidence-based protocols for the most prevalent mental disorders in children and adolescents
- Psychopharmacology
- Indication of pharmacological treatment
- The „Off label” concept
- Effect of pharmacies

- Side-effects of pharmacies
- Classification according to agent
- Classification according to diagnosis

Learning activities, learning methods

- Lectures
- Projects
- Literature reviews, presentations
- Case study

Evaluation of outcomes

Learning requirements, mode of evaluation, criteria of evaluation:

- Written exam
- Oral exam
- Presentation

Mode of evaluation:: exam (5-scale grade)

Criteria of evaluation:

- Detailed knowledge about intervention methods in children and adolescent mental disorders
